

Backend Developer at AllQ.ai

About AllQ.ai:

Founded in Jan 2024, Teragrowth AI Technologies Pvt Ltd is a stealth-mode seed stage startup. Founded by seasoned startup professionals and IIT alumnus Trivikram Reddy Kothinti, Lokesh Dokara & Kavya Madamanchi. Backed by marquee angels and industry veterans, secured 20 Crores in seed funding at a valuation of ~300 Crores.

Our mission is to empower individuals, businesses and governments to achieve high velocity growth through GenAI powered tech products.

Our flagship B2C product, AllQ AI provides world-class mentorship in every key aspect of an individual's life to help them lead a highly successful life.

With our dedicated team, clear vision and the strategic support of marquee angels and industry veterans, we are positioned for rapid growth.

We envision a future where AllQ AI positively transforms the lives of millions, by empowering them to achieve accelerated personal growth, nurture healthy relationships and achieve the right balance. This, in turn, leads to a ripple effect, benefiting communities, economies, and societies at large.

About the role:

During your internship, you will have the opportunity to work with experienced technology leaders who have built world-class products in cutting-edge technologies such as Virtual Reality, Artificial Intelligence, Machine Learning, and many others. You will be working with current trending technologies such as Django, AWS Cloud, Dev Ops, AI Models of the Application, and more. You will be directly involved in the development of the core product which would give you insights into product development and experience the startup culture.

Job Responsibilities:

- Technology Adoption: Quickly learn and adopt the technologies, frameworks, and best practices that are integral to our product development process.

- Problem Solving and Implementation: Analyze problem statements and propose innovative solutions, then implement them following software development principles and best practices.
- Effective Communication and Self-Responsibility: Actively communicate with your mentor, seek guidance when needed, and take ownership of your work.
- Collaborative Participation: Actively participate in code reviews, brainstorming sessions, sprint meetings, and review meetings to contribute ideas, provide feedback, and help drive the success of the team.

Qualifications and Skills:

- Proficiency in at least one programming language preferably Python and the ability to think abstractly to solve ambiguous problems.
- Knowledge of core computer science concepts, such as object-oriented design, algorithm design, and data structures.
- Strong analytical skills and the ability to comprehend complex problems.
- Effective communication skills to articulate technical challenges and propose solutions.

Qualities we'd love to find in you:

- Eagerness to learn, grow, and adapt in a fast-paced startup environment.
- Curiosity and passion for problem-solving, learning new technologies, and making an impact.
- Openness to receiving feedback and using it as an opportunity for improvement.
- Determination to deliver high-quality software and strive for the best outcomes.
- Demonstrate flexibility and ability to adapt to evolving project requirements and team.
- A proactive attitude with a constant drive to achieve the best outcomes and deliver high-quality software.
- Strong collaboration abilities and a friendly approach to working with teams.
- Excellent verbal and written communication skills.

WHY AllQ.ai:

- Get a front-row seat in a high-growth, fast-paced startup

- Work with super motivated individuals and become part of a dedicated team
- High transparency in decision-making
- Great culture that continuously empowers you to grow in your career
- Freedom to experiment and learn from mistakes (Fail fast, learn fast approach)
- Contribute towards the mission of building a SaaS platform with global impact
